About Company

LinX Networks Ltd. is a leading Information and Communication Technology (ICT) solutions provider specializing in the design, deployment, integration, and management of advanced network infrastructure, security systems, unified communication platforms, and smart technology solutions.

Established in 2016, LinX Networks Ltd has grown into a trusted technology partner for corporate organizations, government institutions, financial institutions, multinational companies, and commercial enterprises across Nigeria. Over the years, we have built a strong reputation for delivering innovative, reliable, and scalable technology solutions that help organizations improve security, communication, connectivity, and operational efficiency.

Our expertise spans across enterprise networking, IP surveillance systems, access control solutions, wireless infrastructure, telephony systems, server and data center solutions, and integrated smart technologies. We combine industry best practices with cutting-edge technologies to provide solutions tailored to the unique operational requirements of each client.

At LinX Networks Ltd, we believe technology should not only support business operations but also drive growth, efficiency, and digital transformation. Our approach is centered on innovation, technical excellence, professionalism, and long-term client support, enabling us to consistently deliver projects to the highest standards.

With our head offices strategically located in Lagos and Abuja, alongside support outlets in Port Harcourt, Owerri, Enugu, Kano, and Ogun State, we are well-positioned to provide rapid deployment, technical support, and nationwide service coverage to our clients across Nigeria.

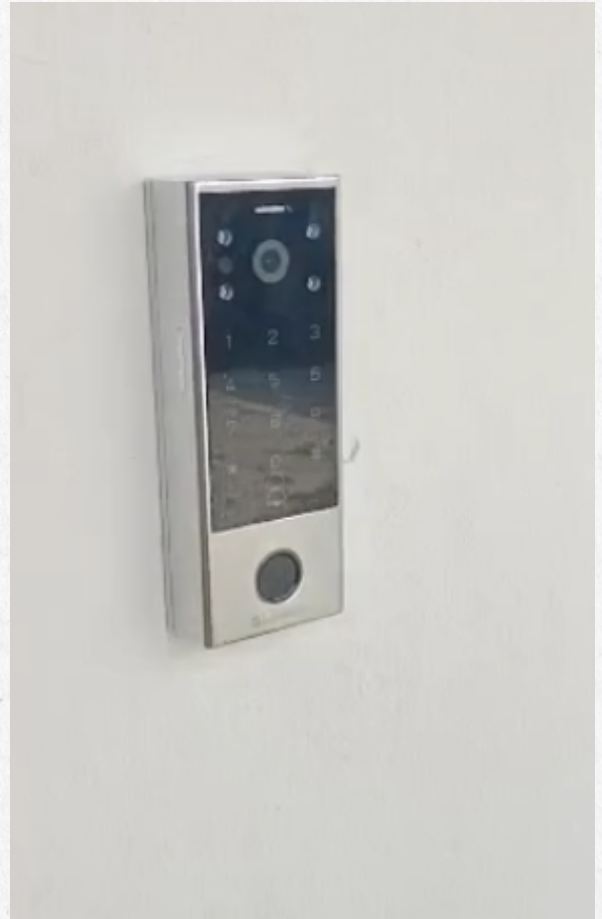

Through our commitment to quality service delivery, customer satisfaction, and continuous technological advancement, LinX Networks Ltd continues to position itself as a dependable partner for organizations seeking secure, intelligent, and future-ready ICT infrastructure solutions.

Vision Statement

To become a trusted leader in ICT infrastructure and smart technology solutions across Africa, delivering innovation that transforms businesses and communities.

Mission Statement

To provide cutting-edge, reliable, and cost-effective technology solutions that enhance operational efficiency, security, and connectivity for our clients.

Our Core Values

Innovation – Delivering forward-thinking solutions

Integrity – Upholding transparency and trust

Excellence – Maintaining the highest quality standards

Customer-Centricity – Prioritizing client satisfaction

Reliability – Ensuring consistent service delivery

Our Services

Network Infrastructure Solutions

- Enterprise LAN/WAN design and deployment
- Structured cabling systems (Copper & Fiber Optics)
- Wireless network solutions (Wi-Fi 6 & Wi-Fi 7)
- Data center setup and optimization

Security & Surveillance Systems

- IP-based CCTV systems (design & installation)
- Video management systems (VMS)
- Perimeter security solutions
- Remote monitoring and analytics

Access Control & Smart Systems

- Biometric and card-based access control
- Smart estate and facility management systems
- Boom barriers, turnstiles, and vehicle access systems
- Visitor management solutions

Our Services

IT Infrastructure & Systems Integration

- Server and storage solutions
- Cloud integration services
- Unified communications systems
- Systems integration across multiple platforms

Maintenance & Support Services

- Preventive and corrective maintenance
- Annual Maintenance Contracts (AMC)
- Remote and on-site technical support
- System upgrades and optimization

Telephony & Unified Communication Solutions

- IP Telephony (VoIP) systems
- Unified Communication (UC) platforms
- Cloud phone systems
- Call center solutions
- Video conferencing systems

Technology Platforms:

- Cisco UC Solutions
- Grandstream IP Telephony
- Mitel Communication Systems

Our Expertise

Linx Networks Ltd has a strong technical team with expertise in deploying solutions for:

- Corporate organizations
- Real estate and estate developments
- Financial institutions
- Government agencies
- Industrial and manufacturing facilities

Technology Partnerships

We collaborate with globally recognized technology manufacturers to deliver reliable and industry-standard solutions. Our partnerships ensure access to cutting-edge products, technical support, and certified deployment standards.

Recent Projects

Linx Networks Ltd projects

International SOS (Ikoyi Lagos)

Organization Overview:

A globally recognized leader in medical and travel security services, supporting multinational organizations with health, safety, and risk management solutions.

Services Rendered:

Linx Networks Ltd delivered a comprehensive video surveillance solution using Axis Communications technology.

Supply and installation of high-resolution IP CCTV cameras

Integration with advanced Video Management Systems (VMS)

Configuration for real-time monitoring and remote access

Ongoing maintenance and system optimization

Solution Impact:

Enhanced situational awareness, improved incident response, and ensured 24/7 security coverage across critical operational areas.

ICMPD – Abuja

Organization Overview:

An international organization focused on migration governance, policy development, and capacity building.

Services Rendered:

Deployment of a fully integrated ICT and security infrastructure:

Structured LAN network design and deployment

Enterprise-grade CCTV surveillance system

Access control system (biometric/card-based entry)

Solution Impact:

Delivered a secure, reliable, and scalable infrastructure supporting both operational efficiency and high-level security compliance

Our Projects

Amnesty International – Abuja

Organization Overview:

A global human rights organization dedicated to advocacy, research, and policy influence.

Services Rendered:

Installation of advanced access control systems
Preventive and corrective maintenance services

Solution Impact:

Strengthened facility security by ensuring controlled access to sensitive areas while maintaining system reliability through continuous support.

Red Bull – Lagos

Organization Overview:

A globally recognized brand known for energy drinks, media, and sports sponsorships.

Services Rendered:

Implementation of a high-performance wireless network solution using Cisco Meraki

Installation and configuration of wireless access points

Network optimization for high-density environments

Ongoing monitoring and maintenance

Solution Impact:

Provided seamless, secure, and high-speed wireless connectivity, enhancing productivity and user experience.

Diageo – Lagos

Organization Overview:

A global leader in beverage alcohol, with a portfolio of premium brands.

Services Rendered:

Comprehensive wireless site survey

Network performance assessment

Detailed reporting with optimization recommendations

Solution Impact:

Enabled informed decision-making for network upgrades, ensuring optimal coverage and performance.

Our Projects

FrieslandCampina WAMCO

Organization Overview:

A leading dairy company in Nigeria, producing and distributing high-quality nutritional products.

Services Rendered:

Installation of CCTV surveillance systems

Structured LAN network deployment

Telephony system setup

Solution Impact:

Delivered an integrated communication and security infrastructure supporting both operational efficiency and safety.

AllCO Capital – Lagos

Organization Overview:

A financial services firm providing investment and wealth management solutions.

Services Rendered:

Deployment of Cisco Unified Communications Solution:

IP telephony system installation

Call management system configuration

Integration with enterprise network

Solution Impact:

Improved internal communication, collaboration, and operational efficiency across the organization.

TotalEnergies

Organization Overview:

A multinational energy company involved in oil, gas, and renewable energy solutions.

Services Rendered:

Installation of CCTV surveillance systems

Deployment of access control systems

Solution Impact:

Enhanced facility security and access management in line with global safety standards.

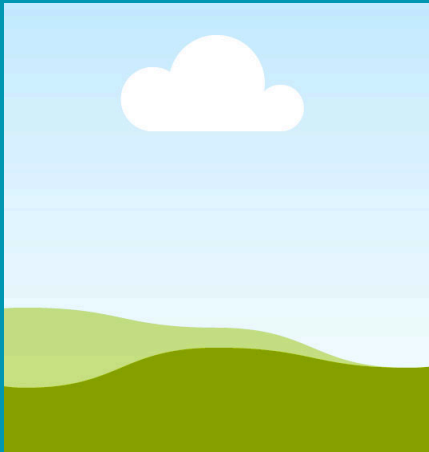

Why Choose Linx Networks Ltd

- Proven track record of successful deployments
- Highly skilled and certified engineers
- Use of premium, globally recognized technology brands
- Tailored solutions to meet client-specific needs
- Strong commitment to quality and timely delivery
- Comprehensive after-sales support

Health, Safety & Quality (HSQ) Commitment

We adhere strictly to industry best practices in health, safety, and quality assurance. Every project is executed with a strong emphasis on risk management, safety compliance, and quality control.
